I always check the shipping as too many times I seller tries to make up what they think they should get in packing and shipping.
At lesat she (??) was honest.

Think and look before you bid!

Content-Transfer-Encoding: quoted-printable

I acquired cheaply an HP 5253B (50-500 MHz) converter from fleabay, for my now-functioning 5245L counter :) and immediately discovered why it was "removed from a working unit" :P

Unfortunately the screw that holds the idler gears had loosened, allowing the gear train to disengage. Consequently the front panel dial is no longer "synced" to the cavity tuning screw, nor to the jackscrew that rides along the top of the cavity, adjusting the positions of the pickup loops inside.

The plastic carrier on the jackscrew has adjustable setscrews fore and aft, that appear to be stops (range limits). So I can run the jackscrew all the way to one end (either 50 or 500 MHz), and set the dial to match, then retighten the idler gears locking everything together again.

But how do I properly align the small gear that actually adjusts the cavity plunger? The service manual only says "do not attempt". Ha!

The only way I can think of is to run a 50 MHz signal from my 190A generator, or perhaps 144 MHz from my 2m rigs, and by trial and error find the plunger setting that resonates at that frequency?

Thanks for any hints!

-Charles

Hello Everyone,

Just finished scanning a 45 page SMR-3 manual that took me over an hour to scan. Right at the most critical part, I was interrupted while tiling the oversize schematic. As a result I am missing one section and have a duplicate of another section.

Does anyone in the group use Adobe PDF composer? Is it possible to remove the "bad" pages in the output file and replace them with "good" pages?

Jerry,

I don't have the Adobe Composer but I have a PDF converter with which =20
I can't edit contents, but I can separate pages of a PDF document, add =20
and delete individual pages and finally combine all the pages into one =20
PDF document.

Now this is exciting! Finally I'll be able to finish restoring my =20
working so-so SMR-3!

hI Jerry,
Yes, I have Adobe Acrobat ver. 5 (I think), an old one, and I've done
what you describe (both things) many times. Do you have the full program,
or do you want me to do it for you? I'd be glad to, or can try to guide you
thru the process, which isn't hard.
